

Images from the Work of Don Hallock

Text and images courtesy of Don Hallock

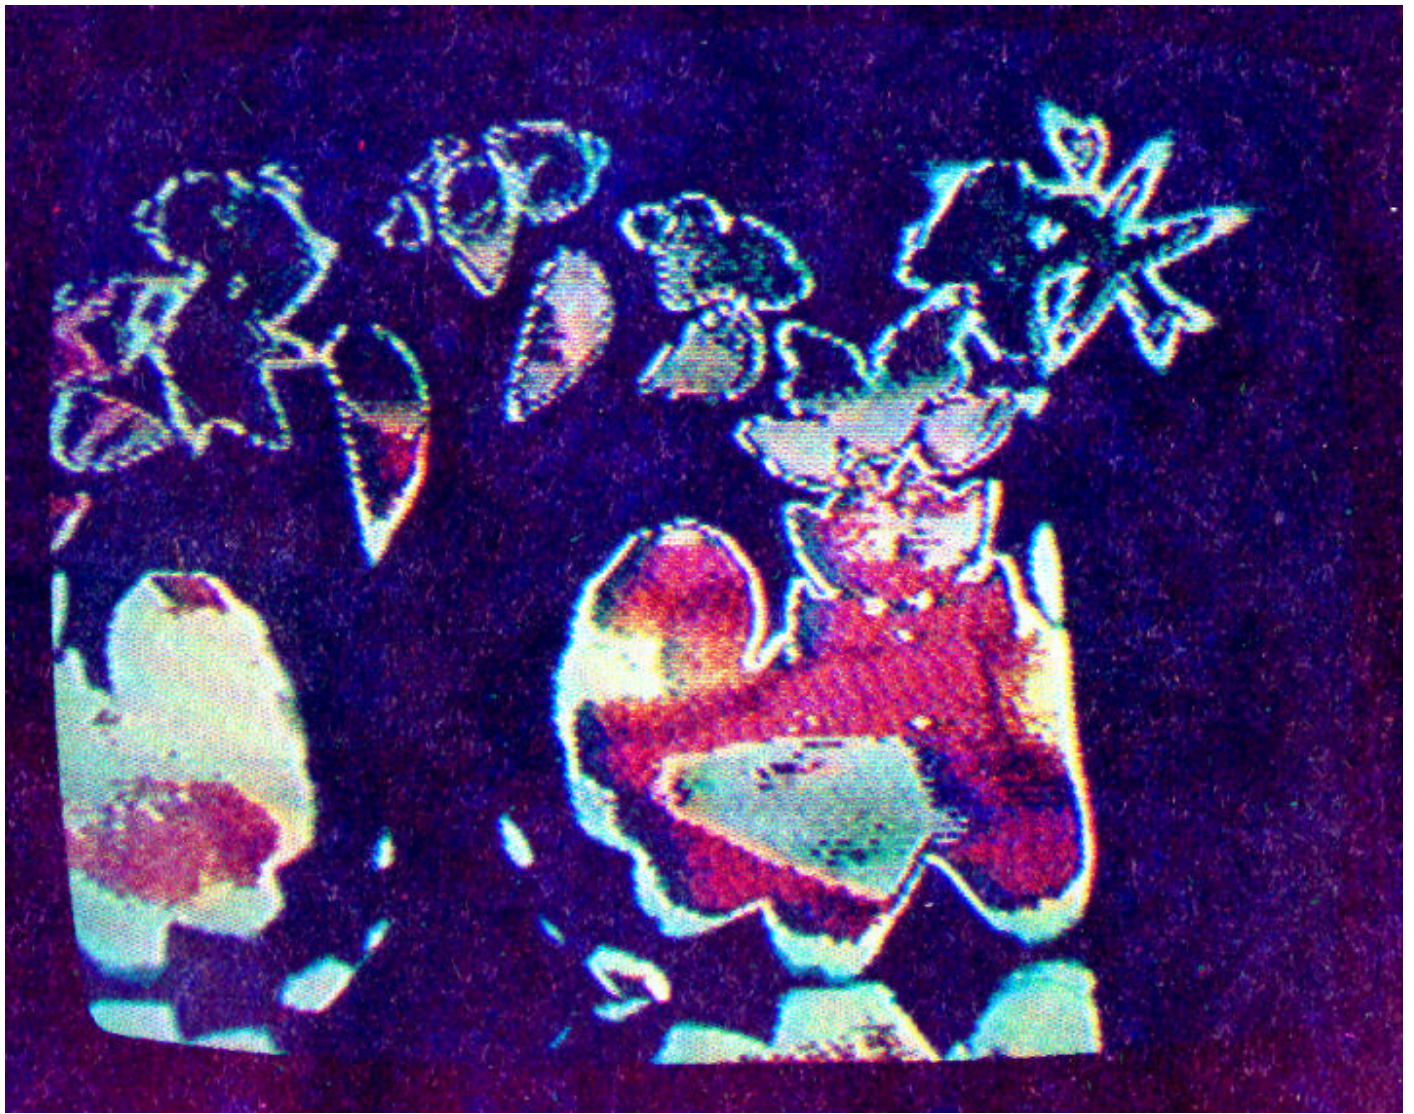

Sundance was an attractive magazine, though, like many San Francisco journalistic efforts of the time, short lived. The cover was glossy and attractive, but the inside was done on newsprint paper. The printing quality was, therefore, not of a high quality, so imagery was poorly rendered. So, aside from badly missing Brice Howard's last name in the text, the photo reproduction of NCET work was horrible. I had to do some considerable computer work to get them to a place where they were even usable. - Don Hallock
